There is very little on costumes, weapons and organization; the focus is on campaign histories and tactics. Battles covered are Mortgarten 1315, Laupen 1339, Sempach 1386, Nafels 1388, Arbedo 1422, St Jacob-en-Birs 1444, Grandson 1476, Morat 1476, Nancy 1476. This is a useful volume for wargamers wishing to know how to use a Swiss army to its potential and for those interested in these specific campaigns and battles.
